

Product Information

Innovative tools, security, applications and Red Hat Network make Red Hat Linux the ideal environment for both servers and workstations.

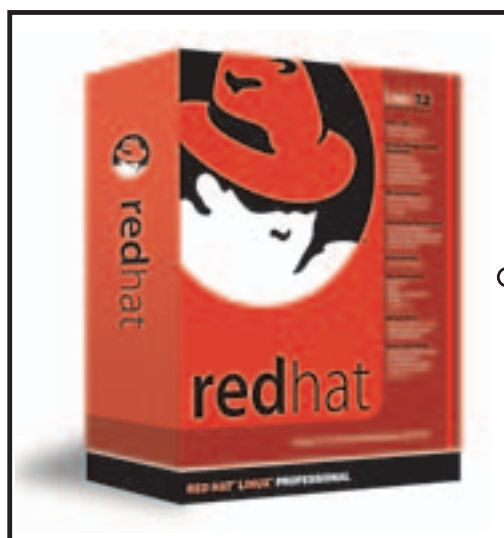

The Red Hat Linux operating system has become the reference platform for 21st century computing. Red Hat Linux has the versatility to function as a web server, intra-network server, development workstation, or a personal productivity workstation. Linux is the fastest growing operating system in the world today and has a 27% share of the server market, of which Red Hat holds 52%, according to Deutsche Banc Alex. Brown estimates and IDC. In addition, according to Netcraft (July 2001), Red Hat Linux runs on 60% of European Linux websites where the version can be identified. Major as well as minor components can be upgraded quickly as Red Hat Linux is developed using the open source model, thus ensuring the highest performance for your system.

Includes
Red Hat Network
subscription for
30 days

Red Hat Linux 7.2

Red Hat Linux 7.2 is the basic Linux standard for technical workstations for the experienced Linux user and gives you the device support, security and tools for a technical workstation.
