

Red Hat Linux version 7 offers a wide array of new capabilities and features for developers and enterprise users.

With enhanced security, new ease-of-use features and increased 3D support, along with dozens of new enterprise-ready applications, Red Hat Linux 7 extends its lead as the most widely used open source server environment in

the world. Through the new Red Hat Network, available now to all Red Hat Linux 7 users on a free trial basis, Red Hat is pioneering a new way to deliver open source products, service, support and information online in real-time.

NEW FEATURES IN RED HAT LINUX 7

- OpenSSL—128-bit encryption for secure communication
- USB support for mice and keyboards
- Graphical firewall configuration tool
- XFree86 4.0 for improved video performance
- 2.4 kernel ready
- Cleaner, faster, more customisable GNOME desktop and Sawfish window manager
- ISDN and ADSL ready

A COMPLETE SOLUTION FOR WORKSTATIONS OR SERVERS

- Easy graphical installation with autodetection of hardware
- Choose between custom or predefined installation classes
- Netscape Web browser and multiple e-mail clients
- Numerous third-party applications run on Red Hat Linux
- True multi-user, multi-tasking operating system
- Software RAID support for RAID 0 through RAID 5
- Kickstart install of one configuration on multiple machines
- IP and name-based virtual hosting
- Upgrade from previous versions of Red Hat Linux as early as 3.0.3

The GNOME desktop is shown here with Netscape for Web browsing, gphoto for viewing digital photographs, the GNOME Control Center for customising your desktop, and RH PPP Dialer for configuring a dialup Internet connection.

Choose the best package for you

And get a FREE Red Hat Network trial.

From the Red Hat Network Web Application, you can now manage Red Hat Linux systems from any machine with an Internet connection and an SSL-enabled Web browser.

See how many new packages are available for your specific systems

Easily add or remove a profile from your account

RED HAT NETWORK

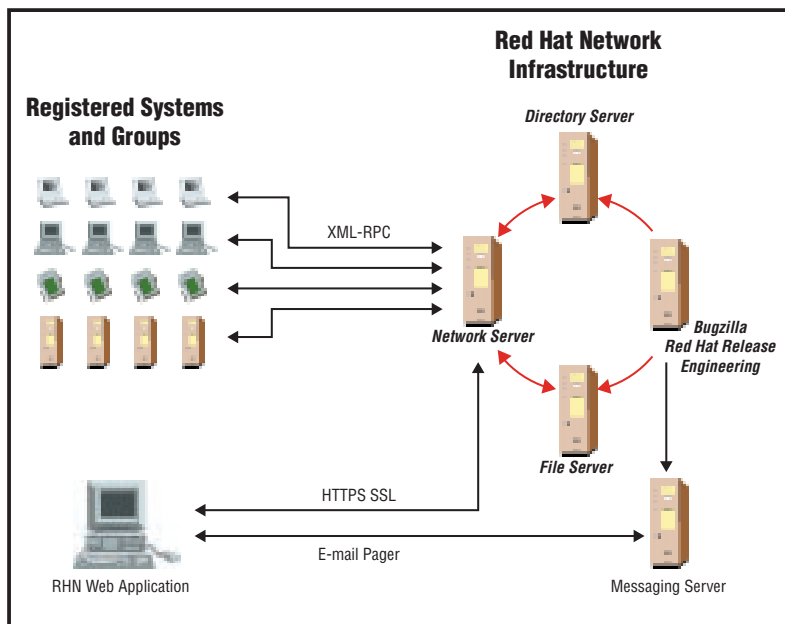

Take advantage of the rapid pace of open source development

We've created Red Hat Network to help make managing your systems easy. The latest software enhancements, security patches, support information – get them in one place, get them automatically.

Red Hat Network is a secure Internet service for the deployment and management of networks of Red Hat Linux systems.

You'll receive only the services you request. All without searching website after website for software updates. Join Red Hat Network and you can:

- Manage your systems efficiently and effortlessly
- Receive information and software specific to your system
- Enhance system productivity and security

Red Hat Network features a browser interface that makes it easy to use; and directory services that make it convenient to distribute services across a large network of systems. Combining comprehensive, proactive services and Red Hat expertise, Red Hat Network lets you take advantage of the rapid pace of open source development. Red Hat Network is efficient in a wide range of functions:

Get application help for each page if you have questions

Customise your account by selecting only the information you need

Receive e-mail notifications each time updates become available

Choose which visual alerts you wish to see

See the health of your network at a glance

See detail on the available updates and know immediately which systems are affected

Customise your Favorite Guides list to include the documentation you use on a regular basis
